

CARL F. BUCHERER  
LUCERNE 1888

EXPLORING  
TIME

A golden, glowing tunnel made of curved lines leading to a bright light at the end. The lines are arranged in a series of concentric, slightly offset curves that create a sense of depth and movement. The light at the end of the tunnel is bright and circular, casting a glow on the surrounding lines.

# MASTERING EXCELLENCE

At Carl F. Bucherer, the quest for excellence and outstanding craftsmanship is deeply rooted in our history.

That spirit has driven us every day since 1888. It is an integral part of our conviction of being a true and authentic Swiss watch manufacturer. Excellence is a maxim that we adhere to in every aspect of what we do and throughout our entire production process: from the first idea to the final timepiece.

Words like mastery, pioneering, mindfulness, and zeitgeist are more than catchy marketing terms. They are values we live by and express with our exceptional watches, handcrafted movements, and enduring commitments. We set the highest standards for the quality of our work. Our timepieces are a compelling testament to this.

## THE LEADER IN PERIPHERAL TECHNOLOGY

There is a reason the Fondation de la Haute Horlogerie (FHH) recognizes Carl F. Bucherer among its top manufacturers: the Swiss watch brand has always been known for its pioneering spirit, innovative approach, and unwavering ambition.

In 2008, Carl F. Bucherer became the first watchmaker to develop and launch peripheral technology in series production. Back then, the company rose to the unprecedented challenge of positioning the rotor of an automatic caliber on the periphery of the movement, reducing its and revealing the beauty of the mechanism.

Today, Carl F. Bucherer is one of Switzerland's leading watch manufacturers, developing outstanding mechanical movements and functional modules in its own workshops, and is the undisputed leader in peripheral technology.

## CFB MANUFACTURE CALIBERS FEATURING PERIPHERAL TECHNOLOGY

Every timepiece has its own beating heart: the movement. Developing a movement calls for an innovative culture, passion, extreme precision, and conceptual finesse – characteristics that Carl F. Bucherer possesses in abundance.

Key technical milestones in Carl F. Bucherer's watchmaking accomplishments are the CFB A1000 and CFB A2000 manufacture caliber families, which incorporate a bidirectional, automatic winding system with a peripheral rotor. The CFB T3000, a unique movement developed entirely in-house, is a world first that combines a peripheral automatic winding system and a peripherally mounted tourbillon that appears to float.

In 2008, Carl F. Bucherer established itself as an industry leader in the field of peripheral technology with the launch of a major innovation: an automatic movement driven by a bidirectional mechanism with a peripheral oscillating weight, in a series production.

With the CFB MR3000, Carl F. Bucherer set new horological standards and underscored its leadership in peripheral technology: for the first time, the peripheral rotor was combined not only with a peripherally mounted floating tourbillon, but also with a peripherally mounted minute repeater regulator.

# MINUTE REPEATER SYMPHONY

The Manero Minute Repeater Symphony is the most extraordinary timepiece that Carl F. Bucherer has ever created in a history spanning more than 130 years, and it is literally ringing in a new era. With its extremely complex mechanism, the timepiece not only demonstrates the highest level of manufacturing competence, but also underlines Carl F. Bucherer's leading role in peripheral technology. It is fair to say that it sets new standards in peripheral technology. The movement features three peripherally mounted elements, all developed in-house: the peripheral rotor patented in 2008; the floating tourbillon, launched 10 years later; and a minute repeater complication, with a peripherally mounted regulator, which launched in 2021.

## MANERO TOURBILLON DOUBLE PERIPHERAL

Carl F. Bucherer demonstrates its innovative capacity with the Manero Tourbillon Double Peripheral, featuring the CFB T3000 movement. It is a world first, developed entirely in-house, combining a peripheral automatic winding system and a peripherally mounted tourbillon that appears to float.

Such a unique tourbillon deserves our full attention: prominently placed at 12 o'clock, it is a real eye-catcher. The tourbillon cage, which rotates around its own axis once every minute, features a second hand that acts as a seconds display. A further distinctive feature is the stop-seconds function, which allows for the rotation of the tourbillon cage to be stopped.

# CFB CAPSULE COLLECTION

Perfect timing: Released in 2023 to mark the 135th anniversary of Carl F. Bucherer, the CFB Capsule Collection, featuring five distinctive watches, signals an exciting new direction for the Swiss watchmaker. Inspired by carbon, the essential element for life itself, and presented in pure black colorways, the collection reimagines some of the brand's most popular timepieces, combining contemporary styling and modern materials with craftsmanship honed over more than a century. Created for people who not only have an entrepreneurial spirit, but who particularly appreciate exploring time differently. The spirit of this contemporary capsule collection is the very embodiment of what Carl F. Bucherer stands for: exploration, travel, and the pursuit of new horizons.

## THE MANERO PERIPHERAL BIG DATE: MANUFACTURE COMPETENCE AND THE SPIRIT OF INNOVATION

The Manero Peripheral Big Date is based on all the characteristics that define Carl F. Bucherer today: a long history, a proud heritage, a founding family, a cutting-edge manufacturer, the skills of some of the world's most talented watchmakers, and, of course, the innovation that has established the brand as the industry leader in peripheral technology - the striking contemporary timepiece is equipped with the brand's CFB A2011 caliber, an automatic mechanical movement with a peripheral rotor.

The timepieces were created for all those who appreciate a dial that conveys the essential details with maximum efficiency. As the name suggests, the eye is drawn to the big date window at 11 o'clock, while its day-of-the-week aperture at 9 o'clock, seconds sub-dial at 6 o'clock and power reserve indicator at 3 o'clock ensure at-a-glance accuracy.

## THE MANERO PERIPHERAL: ELEGANCE, SIMPLICITY, AND ULTIMATE PRECISION

The Manero Peripheral expresses the fundamental values of Carl F. Bucherer: fully designed and manufactured in-house, it is the singular heir to watchmaking competence refined over decades, and three different generations of the Bucherer family who have all explored time in their own way.

Its simplicity of purpose and elegance of expression belie the engineering know-how beneath its surface. Exquisite details elevate its uncomplicated appearance, from its natural colors to its brushed dial, matching hands, and wedge marks. For the wearer alone, an additional benefit: the delight in seeing the movement, and the bidirectional oscillating, peripherally mounted rotor of its automatic winding system, through its sapphire case back.

## PATRAVI SCUBATEC AND THE MANTA TRUST

Nothing could represent Carl F. Bucherer's passion for mindfulness better than its long-standing partnership with the Manta Trust - a UK-based charitable foundation dedicated to studying endangered manta and devil rays - which reflects the two organizations' shared values.

The Patravi ScubaTec is made for diving and underwater exploration of every kind. In a sturdy case and sporty functions, this certified chronometer watch is the perfect companion, in or out of the water. As a sign of the company's commitment, two of these impressive creatures are engraved on the back of the Patravi ScubaTec case.

## A TRIBUTE TO OVER 135 YEARS OF WATCHMAKING HERITAGE

The Heritage Tourbillon Double Peripheral is limited to just 88 timepieces. It is an homage to 1888, the year Carl F. Bucherer was founded, and to the birthplace of the brand in Lucerne - the time and the space in which our exploration of time began.

It features a movement bridge crafted in 18K white gold with a hand-engraved depiction of the city's Chapel Bridge - each one the result of more than two weeks of meticulous craftsmanship.

At the heart of the Heritage Tourbillon Double Peripheral is the in-house CFB T3000 caliber, featuring a tourbillon that appears to float, and an automatic winding system, both mounted peripherally - a world first.

As a special tribute to the rich heritage of the brand and this limited-edition timepiece, the movement's peripheral rotor is crafted in 22K gold.

## THE HERITAGE BICOMPAX ANNUAL COLLECTION: LIVING UP TO ITS NAME

The Carl F. Bucherer Heritage BiCompax Annual collection was created to honor our legacy of more than 130 years of creativity and innovation.

Since its introduction in 2018, we have successfully launched models inspired by some of the most exciting, groundbreaking timepieces we have created in the last century. While the new watches reflect our proud history, they are resolutely contemporary, combining tradition, excellence, and our pioneering spirit.

The watches in this collection effortlessly blend the aesthetic spirit of a golden age of watch design with state-of-the-art mechanical excellence.
